

Havana Soup Kitchen 2012

Havana Soup Kitchen make use of volunteers from abroad for the pre-school children. This year we had Anika and Sabina from Germany and during the same year we made agreement with Volunta, a German organisation who would offer volunteers at a yearly basis to the HSK.

During the same year, the Havana Soup kitchen engaged in giving an entrepreneurship workshop to parents. The aim of the one week workshop was to teach them basic small business activities. One of the main activities was how to make home-made soup. The participants were very excited about this. Certificates were given at the end of the workshop (3-7December2012).

At Christmas season the children were invited once again by Agra for a short event. They were offered gifts and food for the Havana Soup Kitchen.

The manager of the Soup Kitchen was fortunate to attend many workshops, namely; Community caregiver workshop, offered by Lifeline and the Ministry of Gender Equality and Child Welfare.

Year 2013

This year started with the new volunteers from the Volunta organisation. Sophia and Lea was the girls which make a big impression on the Kids.

On October, Michaela from University of Giessen and Frieda from HSK has done a HIV/AIDS related research titled "Who takes care?" A workshop on this activity was also held at the HSK premises. Based on the outcome of this workshop we started a community outreach program to address the burning needs of some vulnerable community members. We have identified some people who are in need at gave them some food parcels as well as some basic needs they had, such as matrasses, clothing, etc.

During this time we also had regular meetings with the parents of the children. The meetings are aimed at getting the parents involved in education of their children.
